

# <R. U. Hacking?/>

Student-led tech society

We are a student-run society hosting Hackathons and tech-savvy-casual events <pub crawls included!>.

Our events are the perfect opportunity for both newcomers and seasoned techies alike to collaborate, learn and connect with others, all facilitated by our support and resources.

R.U.Hacking? works hard to provide our members with strong links to local industry partners, such as the local Google Developer Group and Microsoft. This offers an excellent platform to get inspired by ties with businesses while at university for placements and future career.

Upcoming events:

12<sup>th</sup> October > AIGame Mini Hack

End of October > Hacktoberfest

End of March > 24-Hour Hackathon

Learn. Create. Connect.
